

Pattern 38 Genes Highlighted by GO

GO Term

regulation of nuclear-transcribed mRNA catabolic process, deadenylation-dependent decay

negative regulation of nuclear-transcribed mRNA catabolic process, deadenylation-dependent decay

RNA splicing, via transesterification reactions with bulged adenosine as nucleophile

regulation of postsynaptic membrane neurotransmitter receptor levels

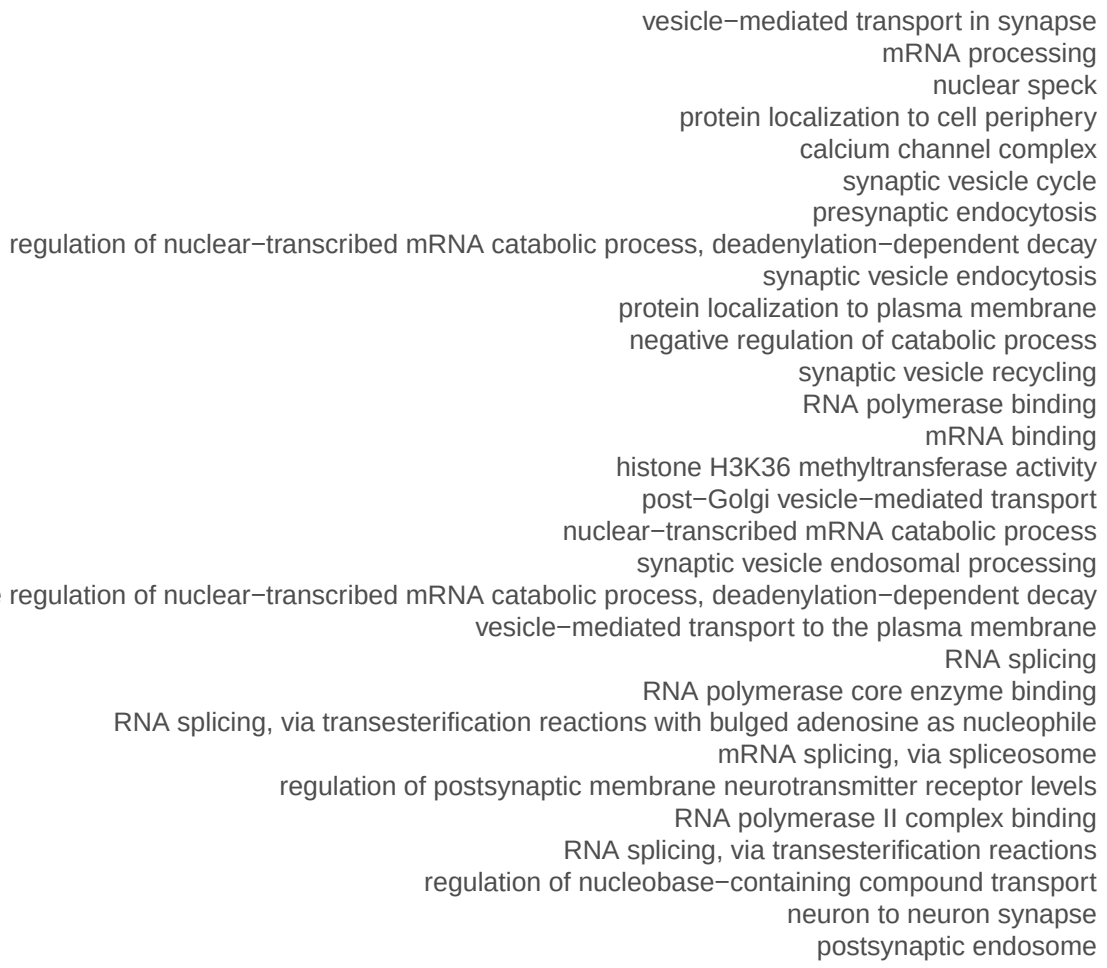

RNA polymerase II complex binding

RNA splicing, via transesterification reactions

regulation of nucleobase-containing compound transport

neuron to neuron synapse
