

Pattern 79 Genes Highlighted by GO

Pattern 79 Top Enriched GO Terms

GO Term

- tau protein binding
- vesicle-mediated transport in synapse
- synaptic vesicle cycle
- tau-protein kinase activity
- proton transmembrane transporter activity
- proton motive force-driven ATP synthesis
- cytoskeleton-dependent intracellular transport
- axo-dendritic transport
- respiratory chain complex
- neuron to neuron synapse
- ATP biosynthetic process
- transport along microtubule
- proton motive force-driven mitochondrial ATP synthesis
- proton transmembrane transport
- neuronal cell body
- purine ribonucleoside triphosphate biosynthetic process
- regulation of synapse organization
- dendrite morphogenesis
- purine nucleoside triphosphate biosynthetic process
- ATP metabolic process
- oxidative phosphorylation
- protein targeting
- axonal transport
- regulation of synapse structure or activity
- purine ribonucleotide biosynthetic process
- ribonucleoside triphosphate metabolic process
- purine nucleoside triphosphate metabolic process
- ribonucleoside triphosphate biosynthetic process
- regulation of synaptic vesicle exocytosis
- nucleoside triphosphate metabolic process
