

Pattern 80 Genes Highlighted by GO

Pattern 80 Top Enriched GO Terms

GRID2

GO Term

- prepulse inhibition
- cerebellar granular layer development
- regulation of long-term synaptic depression
- glutamatergic neuron differentiation
- regulation of postsynaptic density assembly
- cell differentiation in hindbrain
- regulation of postsynaptic density organization
- regulation of postsynaptic specialization assembly
- regulation of excitatory synapse assembly
- cerebellar cortex formation
- startle response
- postsynaptic density assembly
- heterophilic cell-cell adhesion via plasma membrane cell adhesion molecules
- long-term synaptic depression
- cerebellar cortex morphogenesis
- regulation of presynapse assembly
- regulation of presynapse organization
- postsynaptic specialization assembly
- cerebellum morphogenesis
- hindbrain morphogenesis
- excitatory synapse assembly
- postsynaptic density organization
- cerebellar cortex development
- negative regulation of synaptic transmission
- presynapse assembly
- glutamate receptor signaling pathway
- postsynaptic specialization organization
- presynapse organization
- positive regulation of synapse assembly
- postsynapse assembly
